

Ordering numbers up to 1000.

Put the 1st set into ascending order, the 2nd into descending order, the 3rd into ascending order and then continue to alternate between ascending and descending order. (Remember descending starts with d as does the word down).

You DO NOT need to print off this sheet. Just write 1 in the margin of your book and then put the numbers into the correct order. Complete as many as you can.

510	543	470	867	277

198	46	186	164	336

588	516	237	407	522

423	63	135	161	926

586	123	297	998	117

923	74	480	898	130

918	924	680	521	631

505	93	706	544	603

684	956	109	731	955

310	23	139	976	187

695	144	128	17	629

643	776	467	866	978

577	494	408	634	697

641	271	959	747	165

368	270	456	851	677

591	245	716	26	661

you don't have
to be perfect
to be amazing.
