#### **Reading**

Non-fiction books are amazing and give us a lot of new information. Look at a page in one of your non-fiction books. How has the author made it so informative? What features have they used? Make a list in your books and explain what each feature does?

This should only take you 20 minutes to complete.

#### **Writing/English**

##### Life Cycle of a Plant

Today we are going to write our second paragraph explaining **pollination**. Follow these steps slowly and carefully (or attentively) to become a wonderful writer.

1. Read your research all about pollination to remind yourself of your key facts.
2. Then look at your burger/paragraph poster, do you remember how a paragraph starts?
3. Begin your paragraph with a clear subheading (double check it is underlined). Remember to use your neat handwriting.
4. Write your clear and structured paragraph full of lots of juicy facts. Remember to include an opening sentence and a closing sentence. It should be no more than 2/3 of a page.

All great writers must reread their work and check it makes sense. Try reading it aloud to your teddy? Can they spot any mistakes?

Challenge: Can you find **three** examples of using the present tense? Put a 2 in the margin next to any present tense verbs you have used to match your checklist.

#### **Maths**

CGP Book Pages: Pg 32 and 33 Adding and subtracting fractions with the same denominator.

Please watch the video below to remind yourself how to add and subtract fractions with the same denominator. Please only watch it to 3.38 as it then teaches you a layout that we do not use.
