

Friday's Maths Slides

Friday

Here is a Rekenrek with 100 beads.

50 out of 100 beads are red.

50 out of 100 beads are white.

50₁₀₀ are red, and 50₁₀₀ are white.

Half of the beads are red and half are white.

$$\frac{1}{2} = \frac{50}{100} = \frac{5}{10} = 0.5 \text{ so } \frac{1}{2} \text{ is } \boxed{0.5} \text{ as a decimal.}$$

The beads are split equally on each side of the Rekenrek.

There are 4 equal groups.

1 out of 4 equal groups = 25 beads.

1 out of 4 equal groups = 25₁₀₀

$$\frac{1}{4} = \frac{25}{100} = \boxed{0.25}$$

What fraction is represented by 3 out of the 4 groups?

Can you write this as a decimal?

$$\frac{3}{4} = \frac{75}{100} = \boxed{0.75}$$

Activity 1

Record the equivalent fractions

$$0.5 =$$

$$0.25 =$$
