

# Geometry

## 2-d shape name and properties

Name these shapes and write their properties.

	Name: _____ Number of sides: _____ Number of corners: _____		Name: _____ Number of sides: _____ Number of corners: _____
	Name: _____ Number of sides: _____ Number of corners: _____		Name: _____ Number of sides: _____ Number of corners: _____
	Name: _____ Number of sides: _____ Number of corners: _____		Name: _____ Number of sides: _____ Number of corners: _____
	Name: _____ Number of sides: _____ Number of corners: _____		Name: _____ Number of sides: _____ Number of corners: _____

**Challenge:** Lucy says that all 2-d shapes have the same number of sides as their number of corners. Is she right? Explain your answer:

---

---

---

## Sorting 2-d shapes

Either label the shapes on the next page and then write where they should be in the Carroll diagram below, or cut them out and stick them in the correct part.

<b>Has three or fewer sides</b>	<b>Has more than three sides</b>
