

# Big Maths

Give yourself 100 seconds (1 minute and 40 seconds) to complete as many of the calculations in the first box as possible. You can work across the rows or down the columns or work randomly. You can miss out questions if you need to. There are addition and multiplication questions - watch out for which operation you need to use! The aim is to complete as many questions as possible. After you have finished, mark your answers and record your score. See if you can improve your score each time.
